

Thank you for purchasing our **Chick Scale 103** portable poultry weighing unit. The **Chick Scale 103** is a stand alone, battery operated precise manual weighing system specially developed for the weighing of live poultry.

The **Chick Scale 103** can weigh up to 9 batches and supply the following information.

- Total number of birds weighed.
- Average weight.
- Batch uniformity with four user chosen formulas:
 1. Coefficient of Variation (CV)
 2. Standard Deviation (SD)
 3. Standard Deviation in Percentage (SDPR)
 4. Percentage range
- A uniformity graph in 25 gram steps (in Libra 0.05 LB steps)
- Recall of the last 256 weightings.

All information in the **Chick Scale 103** can be easily viewed using the keyboard.

The supplied computer program can be used to view all information in a graphic form.

Please read thoroughly both the User's Manual for the weighing unit and the computer program before usage.

Note: Please install the computer program found on this disk before connecting the USB between the Chick Scale weighing unit and computer.
